

**Gesture Interaction to make Machine  
learn by applying Intelligence**

- **Extracting the object of area of interest**
  - **recognising the hand**
  - **locating the index finger**
  - **extracting the pointed object**
- **Learn extracted objects with the name provided**
  - **voice-to-text conversion**
  - **mapping image to text**

- **HCI - Human Computer Interaction**
- **Teach system by gestures.**
- **Existing**
  - **detection and learning of moving objects**
- **Difference**
  - **instead of learning moving objects,  
make the system learn the object  
being pointed**
